dog

APPROXIMATE AGE

8-10 years

BREED

Labrador?

COLOR(S)

Black

WAS THE ANIMAL WEARING TAGS?

no

APPROXIMATE WEIGHT

N/A

COMMENTS

My friend Marcelo was leaving his church closer to the place the trash and he found the dog. He was laying in the middle of the street, and Marcelo checked if there was a collar or a tag with the owner information. However there was none. Them, he started to knock in the people's house on the street asking if they were the owners. Since none of them knew who the dog belongs to, he tried to help the dog that could not stand up and was looking in pain, hungry and a with a lot dirty in his long fear. He was able to carry the dog and put in the car and drove home in attempt to help the dog. He placed the dog in his dog's cannal, separating him from his other 2 dogs and a cat. Avoiding more stress for this dog and other problems with his pets. He tried to take the dog to PETCO for assistance and check if there was a chip, however the responsible veterinarian was not present. He requested that the dog to be groomed and called me checking if i could stay with the dog and help him with all procedures. So, I did. I have the dog in my apartment, and I doing the legal procedures. I will be glad to help in the whey i Can and adopt him if he is not lost.

ADDITIONAL COMMENTS ABOUT THE ANIMAL

The dog was showing signs of hunger and severe thirst. Water and food were provided, which he ate and drank with considerable appetite and thirst. The animal had difficulty getting up and standing, however, he can walk with difficulty. The hind legs showed muscle atrophy, and the front paws were swollen. The animal is licking its paws and showing signs of pain in both limbs. The dog's abdomen is distended, and its entire body is edematous. He urinated a few times. The urine was yellow, a bit more concentrated, but without the presence of blood. He defecated this morning. The stool color was normal, with no diarrhea or visible parasites. He is eating normally and drinking plenty of water.

The name of my friend is Marcelo and his phone for contact is (863)3788430

Me and Marcelo, hope the best for this dog and If I am allowed, I would love to adopt him and figure it out his diagnostic and follow the treatment prescribed.
